

## SMITH JANITORIAL SERVICES COVID-19 PROTOCOL INFORMATION

In order to do our best to keep our customers safe during the COVID-19 crisis, we at **Smith Janitorial Service, Inc. (SJS)** have developed a disinfecting protocol for church facilities. This protocol follows the recommendations set forth by the Centers for Disease Control and Prevention (CDC).

While we do not know when churches are going to be allowed to reopen, we must plan ahead for the event as there are different levels of disinfecting services available.

### Level 1

Includes wiping high touch solid surfaces, including table tops and chairs using a EPA-registered disinfectant for use against SARS-CoV-2, the novel corona virus that causes the disease COVID-19. SJS is strictly using products from this list to sanitize your hard surfaces.

### Level 2

Includes soft and porous materials like carpets, rugs or material in seating. SJS would like you to know that there is no such thing as an EPA approved product for soft surfaces like carpet and furniture (mainly because it is hard to test these on soft surfaces). What is recommended is a thorough cleaning of the soft surfaces. Which is what SJS can provide for you.

### Level 3

Includes fogging the entire room, which requires rooms to be closed for a couple of hours. SJS would also like to address a rumor and misinformation that is circulating from other cleaners claiming that fogging can be done to sanitize. This is not true. Fogging is for the air. It is not for sanitizing surfaces. Although things are fluid, this virus is so far known to live on surfaces longer than in air. The virus lives up to 3 hours in the air and days on surfaces. Fogging is fine when done after Level 1 protocol.

### Level 4

Includes the use of electrostatic equipment. The electrostatic disinfecting cleaning regimen is a way of thoroughly applying germicide/disinfectant to solid surfaces that are being treated. The sprayer places a positive charge on the germicide, which enables it to adhere more effectively regardless of the shape or angle of the surface in question.

SJS is stocking the proper paper products and supplies to get your facility open again. While, some products, ie., hand sanitizer, spray disinfectant, and face masks are in limited supply, we are daily monitoring the availability of these products and will have them in stock as soon as possible.
